

# Research Assistant, Tableau Data Analyst – Job Description

## **TPG Background**

TPG is a leading global alternative asset firm founded in 1992 with approximately \$85 billion of assets under management and 14 offices around the world. TPG's investment platforms are across a wide range of asset classes, including private equity, growth equity, social impact, real estate, and public equity. Across these platforms TPG has over 280 companies within its portfolio such as Airbnb, Beautycounter, Calm, ipsis, Philz Coffee, Spotify, Uber, and Viking Cruises.

## **Y Analytics**

Y Analytics' mission is to increase the amount and effectiveness of capital allocation for the greater good, as described in the UN SDGs, by increasing trust in the social and environmental impact achieved by that capital. Y Analytics was launched in parallel to The Rise Fund and founded in partnership with TPG/Rise to provide best-in-class insights and tools that improve capital allocation decisions. Our rigorous approach to impact assessment and management draws on evidentiary academic and economic research, enabling greater use of evidence in capital allocation decision making and impact valuation. In addition to conducting impact valuation for the TPG Rise Funds, Y Analytics is also responsible for managing sustainability/ESG across TPG. We support TPG and its portfolio companies by assessing and advising on value creation through Environmental, Social, & Governance (ESG) performance.

## **Position**

Y Analytics is seeking a Tableau Data Analyst Research Assistant (RA) to support research and analysis of social impact from existing and potential investments, and drive improved performance on environmental, social, and governance (ESG) factors across TPG's global investment portfolio. The Tableau Data Analyst RA will contribute to the team primarily through the design and deployment of dashboards to build efficiencies in key aspects of the Y Analytics team analysis, such as ESG performance benchmarking and impact reporting and insight dissemination.

The Tableau Data Analyst Research Assistant will be responsible for:

- Data preparation and management: construct and consolidate internal databases as well as manage existing datasets to be used in Tableau visualizations
- Visualization design and deployment: The Tableau Data Analyst will also drive the development of dashboards, their automation and deployment, to be used by key stakeholders within Y Analytics and TPG.

The position is open to current graduate students and undergraduates and is a great opportunity for someone who is passionate about data visualization, climate, ESG/impact, global development, and/or economics and who has a strong desire to expand and deepen knowledge of impact, and ESG analysis in a client-focused environment.

## **Requirements**

- Must be authorized to work in the U.S.

- Graduate or Undergraduate student currently pursuing a degree in Computer Science, Business, Economics, Environmental Sciences, Environmental Engineering, Environmental Sustainability, Public Administration, or another relevant program
- Demonstrated ability to construct, manipulate and manage data sets in Tableau, PowerBI or a related software (active Tableau certification a plus)
- Experience or demonstrated interest in consulting, finance, impact investing, or a related field
- Experience with Access, SQL, MS Azure, and Excel
- Excellent written and spoken communication skills, and fluency in English

**Duration:** Initial 10-12 weeks agreement with possible extension opportunity. Approximately 20 to 40 hours per week.

**Start date:** Early to mid-January 2022.

**Location:** Remote

**Application Instructions:**

In lieu of a cover letter, please share a work sample of your data visualization experience. Please send your resume and response to [Jobs@YAnalytics.org](mailto:Jobs@YAnalytics.org) and include a subject line with the format: "Last Name, First Name –Tableau Data Analyst RA Application".
