

## **Y ANALYTICS (TPG) – FELLOW, ESG PERFORMANCE - ASIA REGION**

**Location:** United States (Remote)

- Note that the work model will be hybrid or remote, and availability for late night or early morning calls is required, given this position's interactions with colleagues in the Asia region

**Timing:** This is a temporary position that will begin in early June 2022 and last through October 2022. Exact start and end dates will be determined based on both the candidate's and our team's needs.

**Application Instructions:** In lieu of a cover letter, please prepare a 1-page response to the prompt below. Please send your resume and response to [jobs@yanalytics.org](mailto:jobs@yanalytics.org). Write in the subject line: "Last Name, First Name – ESG Asia Fellow Application."

### **Application Prompt (please limit your response to a single page or less):**

Imagine you are assessing the ESG (environmental, social & governance) performance for a hospital network located in an emerging market in Asia. Please describe:

- (1) how you would conduct an initial market scan to "get smart" on the health care provider market in the region;
- (2) how you would determine what ESG-related factors are relevant to the company and industry; and
- (3) how you would assess the company's current risk exposure and performance against these ESG factors, including what sources and data you would use.

### **ABOUT Y ANALYTICS**

[Y Analytics](#) is [TPG's](#) innovative capability, purpose-built to understand and improve the environmental and social impacts of deployed capital. Our mission is to increase the amount and effectiveness of capital allocation for the greater good, as described in the UN SDGs, by increasing trust in the social and environmental impact achieved by that capital.

Y Analytics was launched in parallel to [The Rise Fund](#) and founded in partnership with TPG/Rise to provide best-in-class insights and tools that improve capital allocation decisions. Our rigorous approach to impact assessment and management draws on evidentiary academic and economic research, enabling greater use of evidence in capital allocation decision making and impact valuation.

Y Analytics is responsible for managing sustainability/ESG across TPG. We support TPG and its portfolio companies by assessing and advising on value creation through Environmental, Social, & Governance (ESG) performance. This role will be directly engaging with TPG platforms and portfolio companies across the investment lifecycle: beginning with diligence, to onboarding and agenda-setting, during holding, and upon exit.

As we continue to grow, we are leveraging our capabilities in new and innovative ways and sharing our learnings with the broader investment and research communities.

## PRIMARY RESPONSIBILITIES

The fellow will support Y Analytics' ESG assessments, data analysis and content development for the Asia region. Primary responsibilities include:

- **Supporting ESG-related diligence of potential investments and portfolio companies, within TPG's Asia investment platforms.** ESG performance assessments are integral to TPG's investment and portfolio management processes. This work requires a combination of desk research and data analysis to assess the risk, performance, and impact of a company through an environmental, social and governance lens. An inquisitive mindset, self-direction, and pragmatic client service orientation are assets given the rigor and speed of private equity deal flow.
- **Analyzing ESG/impact, operational, and financial data to baseline, benchmark, and enhance performance of TPG's Asia portfolio.** The fellow will generate insights on portfolio companies' ESG performance, along with risks/mitigations and value creation opportunities. Example responsibilities will include survey analysis, leveraging ESG data from third party platforms, developing and implementing replicable benchmarking methodologies and visualizations, and synthesizing and communicating results and priorities to portfolio companies and internal stakeholders.

## REQUIRED QUALIFICATIONS

- Undergraduate degree required, but a graduate degree is a plus. Minimum of one to two years of full-time work experience. Ideal candidate will have experience in ESG/sustainability related consulting, research and analytics, or similar professional services.
- Commitment to Y Analytics' mission to improve the future of humanity and our planet through effective capital allocation for the greater good
- Familiarity or demonstrated interest in ESG standards is preferred
- Demonstrated ownership and self-direction: must be able to drive work forward independently, self-guide research and manage projects, and deliver top quality, highly polished outputs
- Exceptional written and verbal communication: must be able to synthesize findings from research and data analysis in presentations and written documents, and communicate these insights to internal and external senior executives
- Strong strategic thinker and problem solver: must be able to navigate challenges (e.g., data gaps) with creative problem-solving ability and a can-do attitude
- Strong quantitative analytics capabilities: must be able to quickly and accurately analyze company and third-party data and generate practical insights
- Highly collaborative: must be a strong team player who is effective in a teamwork-heavy, cross-functional environment
- Fluency in English
- Demonstrated interest and experience working in Asia or with businesses in Asia is preferred
