Please send your resume and application prompt response to [Jobs@YAnalytics.org](mailto:Jobs@YAnalytics.org) and include a subject line in the following format: “Last Name, First Name – Data Analytics and Reporting RA”. Only applications that follow these instructions will be considered.

### **TPG Background**

TPG is a leading global alternative asset management firm, founded in San Francisco in 1992, with \$269 billion of assets under management and investment and operational teams around the world. TPG invests across a broadly diversified set of strategies, including private equity, impact, credit, real estate, and market solutions, and our unique strategy is driven by collaboration, innovation, and inclusion. Our teams combine deep product and sector experience with broad capabilities and expertise to develop differentiated insights and add value for our fund investors, portfolio companies, management teams, and communities.

TPG’s success depends on our people, and we build and sustain our world-class team by creating an inclusive, supportive culture within the firm that seeks excellence and encourages humility and transparency. The quality of our investments and our ability to build great companies depend on the originality of our insights. Reaching our firm’s full potential means supporting every team member to bring the fullness of their unique perspective to their work and to our community. We are committed to a diverse, equitable, and inclusive workplace to foster diversity of thought and reflect the breadth of our limited partners and portfolio companies.

### **Y Analytics**

[Y Analytics](#) is TPG's innovative internal capability, purpose-built to understand and improve the environmental and social impacts of deployed capital, in alignment with value creation opportunities.

Y Analytics was launched in parallel to [The Rise Fund](#) and founded in partnership with TPG/Rise to provide best-in-class insights and tools that improve capital allocation decisions. Our rigorous approach to impact assessment and management draws on evidentiary academic and economic research, enabling greater use of evidence in capital allocation decision-making and impact valuation.

Today, Y Analytics directly supports impact assessments and decision-making for The Rise Fund, the [TPG Rise Climate Fund](#), and other TPG companies/vehicles with impact objectives. Y Analytics’ mandate also covers Responsible Investing across TPG’s firm and portfolio. We support TPG and its portfolio companies by assessing sustainability performance and advising on value-creation opportunities.

As we continue to grow, we are leveraging our capabilities in new and innovative ways and sharing our learnings with the broader investment and research communities.

**Position**

Y Analytics is seeking a Data Analytics & Reporting Research Assistant to support our Data, Analytics, Reporting, and LP Engagement (DARL) team with special sustainability analytics projects, including creating new dashboards, automating reporting processes, and other data-focused process/program improvements. The Research Assistant will also support TPG's recurring firm-wide sustainability analytics and reporting initiatives, including emissions accounting, regulatory reporting, physical climate risk assessment, and LP engagement support.

**Requirements**

- Must be authorized to work in the U.S.
- Graduate student or advanced undergraduate (i.e. student entering their final year of undergraduate studies)
- Excellent data analytics skills, including facility with Microsoft Excel and preferably one or more other statistical tool(s) (e.g., VBA, Python, R, SQL)
- Advanced data visualization experience, including the use of one or more dashboarding tools (e.g. PowerBI, Tableau, Looker, Sigma, Streamlit)
- Experience or demonstrated interest in responsible investing, corporate social responsibility, climate/sustainability, or a related field
- Ability to manage multiple projects simultaneously and prioritize workload with attention to detail, a sense of urgency, and a strong work ethic and dedication to consistently provide quality work
- Excellent written and spoken communication skills, and fluency in English

**Application Prompt (please limit your response to a single page or less)**

Describe a data analysis project you've worked on in the past, whether in school or professionally. What was the goal of the project, how did you approach it, and what was your outcome? What technical tools did you use, and what challenges did you face?
